

Set up my email account to work with Outlook 2002 or 2003

1. In your Outlook toolbar, click **Tools** and select **Email Accounts**.
2. Click **Add a new e-mail account**.
3. In the **E-mail Accounts** window, click **Add a new e-mail account** and then click **Next**.
4. For Server Type, select **IMAP** (or **POP3**) and then click **Next**. (We recommend you use IMAP. IMAP accounts are the recommended option for customers that want to check email from multiple sources (home computer, work computer, mobile phone).)
5. Enter your **User Information**:

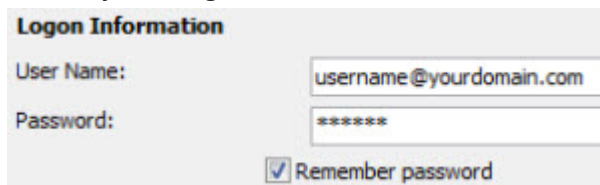

User Information

Your Name:

E-mail Address:

6. In the **Incoming Mail Server** field, enter **imap.homestead.com** for **IMAP** or **pop.homestead.com** for **POP3**.
7. In the **Outgoing Mail Server** field, enter **smtp.homestead.com**.
8. Enter your **Logon Information**:

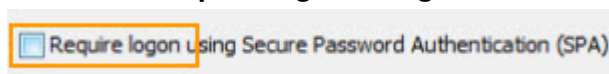

Logon Information

User Name:

Password:

Remember password

- In the User Name field, enter your web email address. For example, username@yourdomain.com.
 - In the Password field, enter the password for the email account you want to access from Outlook.
9. Clear the **Require logon using Secure Password Authentication** checkbox.

Require logon using Secure Password Authentication (SPA)

10. Confirm the advanced settings. Follow the specifications depending on the type of server you chose in Step 7:

Set up my email account to work with Outlook 2002 or 2003

- For **IMAP**, confirm the advanced settings using the [IMAP email specifications](#).
- For **POP3**, confirm the advanced settings using the [POP3 email specifications](#).

Important: If you don't complete the advanced settings, you'll see error message **550 #5.1.0 address reject**.

Note: To test the settings, send a message directly from Outlook.
