

## Set up an Android to access email

1. On your Android (Droid) phone, click the **Mail** icon. To locate the icon, open the applications tray.
2. Add a New Account.
  - If you already have an email account set up, touch **Menu**. Go to **More** and then, touch **New Account**.
  - If you don't have an email account set up, **Choose a mail provider**. Touch **Other (POP3/IMAP)**.

**Note:** If you don't see the More option, go to **Menu** and touch **Accounts**. Then, go to **Menu** and touch **Add account**.

3. Enter your email address and password. Then touch **Manual setup**.
4. Select **IMAP** (or **POP3**). (We recommend you use IMAP. IMAP accounts are the recommended option for customers that want to check email from multiple sources (home computer, work computer, mobile phone).)
5. Change the IMAP server to **imap.homestead.com** (or use **pop.homestead.com** for **POP3**).
6. Confirm the Incoming Settings:
  - **Port: 143** for IMAP (or **Port: 110** for POP3).
  - **User name:** your email address
  - **Password:** your mailbox password
  - **Security Type:** None
7. Touch **Next**.
8. In the Outgoing server settings, change the **SMTP server** to: **smtp.homestead.com**.
9. Confirm the Outgoing server settings:

- **Port:** 587
- **User Name:** your email address
- **Password:** your mailbox password
- **Security Type:** None

10. Touch **Finish setup**.
